Important information for U.S. customers

Note:
Certain devices and references made herein to specific indications of use may have not received clearance or approval by the United States Food and Drug Administration. Practitioners in the United States should first consult with their local KARL STORZ representative in order to ascertain product availability and specific labeling claims. Federal (USA) law restricts certain devices referenced herein to sale, distribution, and use by, or on the order of a physician, dentist, veterinarian, or other practitioner licensed by the law of the State in which she/he practices to use or order the use of the device.

Important Notes:

It is recommended to check the suitability of the product for the intended procedure prior to use.

Endoscopes and accessories contained in this catalog have been designed in part with the cooperation of physicians and are manufactured by the KARL STORZ group. If subcontractors are hired to manufacture individual components, these are made according to proprietary KARL STORZ plans or drawings. Furthermore, these products are subject to strict quality and control guidelines of the KARL STORZ group. Both contractual and general legal provisions prohibit subcontractors from supplying components manufactured by order of KARL STORZ to competitors.

Any assumptions that competitors' endoscopes and accessories are acquired from the same suppliers as the KARL STORZ products are not correct. Moreover, endoscopes and instruments provided by competitors are not manufactured according to the design specifications of KARL STORZ. This means it cannot be assumed that these endoscopes and accessories – even if they look identical on the outside – are constructed in the same manner and have been tested according to the same criteria.

Standardized Design and Labeling

KARL STORZ participates both in national and international bodies involved in the development of standards for endoscopes and endoscopic accessories. Standardized design and development therefore have long been implemented consistently by KARL STORZ. The user can rest assured that all products by the KARL STORZ group have been designed and constructed not only in compliance with strict internal quality guidelines, but also with international standards. All data relevant for safe use, such as viewing direction, sizes and diameters, or notes regarding sterilization of telescopes, are applied to the instruments, have been formulated according to international standards, and therefore provide reliable information.

As we constantly seek to improve and modify our products, we reserve the right to make changes in design that vary from catalog descriptions.

Original or Counterfeit

KARL STORZ products are name brand articles renowned around the world and represent the state of the art in important areas of healthcare. A large number of "copy cat" products are currently being offered in many markets. These products are designed intentionally to resemble KARL STORZ products and use marketing strategies that at least point out their compatibility with KARL STORZ products. These products are by no means genuine products, since genuine KARL STORZ products are sold worldwide exclusively under the name of KARL STORZ, which appears on the packaging and the product. In the absence of such labeling, the product is not from KARL STORZ.

KARL STORZ, therefore, is unable to ensure that such products are actually compatible with genuine KARL STORZ products or can be used with them without injury to the patient.

KARL STORZ No-Wrap Container Systems

Your KARL STORZ equipment deserves the highest quality sterilization solutions available to protect them during reprocessing, transportation, and storage. Our No-Wrap Sterilization Containers provide just that: high-quality, low-waste sterilization solutions that help bring down the total cost of ownership of your investment. These containers help sterile processing departments realize significant cost-savings by eliminating blue-wrap and improving overall efficiency.

Take the guesswork out of compliance

- KARL STORZ containers are universally validated for all modalities, making sterilization compliance easy!*

Custom configured to house KARL STORZ products

- Each KARL STORZ container is specifically designed for KARL STORZ products, helping to protect and preserve their quality from sterile processing to back table.

Save time and money over blue wrap trays

- Disposable filters cost significantly less than the blue wrap required by trays**, and they require less time to assemble, helping SPD run more efficiently.

Constructed of aircraft-grade anodized aluminum to protect against pitting and corrosion

- Higher gauge aluminum provides significant durability advantages over polymer trays.

10-21

* While KARL STORZ containers are universally validated, many KARL STORZ products are not. Please refer to the product IFU to determine correct sterilization modality prior to reprocessing.
