

How we help

When you choose Accredo, you'll receive individualized treatment as prescribed by your doctor and focused attention from your clinical support team.

CLOSE CONNECTIONS

Your own regional care team is available to you 24/7 – with a real person answering your call.

EDUCATION AND COUNSELING

Our specialty-trained nurses and pharmacists understand the complexity of your condition. They will answer your questions about your devices, from infusion pumps to catheter lines or inhalation devices, to mitigation of side effects and support managing your overall condition.

FEWER ER VISITS

Unless it's an emergency, we want to keep you out of the ER.

- We'll be in touch regularly to make sure you have adequate medication and supplies
- We use tracked shipping for deliveries to your home, school or workplace (as permitted by law)
- In urgent cases, we have branch pharmacies across the country that can courier medication and supplies to you when and where needed
- Accredo will coordinate skilled nursing in your home when prescribed

FINANCIAL SUPPORT

Accredo offers a wide range of financial assistance, including support with enrolling in foundations, assistance with insurance appeals when needed and overall guidance in managing the costs of your condition.

We'd love to be your pharmacy of choice. Our PAH and IPF clinicians are here to help 24 hours a day, 7 days a week.

Meet your team

Lisa is one of the home care nurses who comes to the hospital or your home to help educate you on your medications, care and independence.

Jill is one of the many pharmacists who are highly trained in the worlds of PAH and IPF. She reviews prescriptions for any drug interactions that could happen based on your other medications. She's also available for medication counseling and helps coordinate care with your doctor.

Telephonic nurses like **Jenica** assist you with any condition-specific issues, medication or device issues that you might encounter. They will also help set up your home health nursing if your physician prescribes it.

Laura is part of the team of insurance representatives. They obtain prior approvals for your prescription from your insurance company (or payer) before shipping and help explain your insurance paperwork.

This is **Leslie**, a nurse educator who teaches patients, family members, schools, employers, ER staff and insurance companies about your condition.

And finally, **Steve** is one of our field patient advocates who connect you with programs and services from Accredo and your community to provide you with additional support.

Matt is a patient care advocate and his job is to stay in close contact with you to ensure you have the medication and supplies you need.
