

# Duplex Ultrasound Evaluation for Lower Extremity Venous Insufficiency

## OVERVIEW

This series is designed for healthcare professionals who desire to complement existing ultrasound skills with focused assessment for the patient presenting with signs and symptoms of venous insufficiency. Each module is presented in a case study format and provides step-by-step instruction on how to conduct a duplex ultrasound evaluation. This series consists of seven modules ranging from 9-15 minutes.

## ACCREDITATION INFORMATION

*American Society of Radiologic Technologists*

This activity is approved for **2.5 Category A CE credits** by the ASRT.

## WHO SHOULD TAKE THIS COURSE?

This continuing education activity is intended for a radiologic technologist or other healthcare professional who wants to improve knowledge and skill in ultrasound for the patient presenting with venous insufficiency symptomatology.

## HIGHLIGHTS

After completing this continuing education activity, the participant should be able to:

1. Review sequential steps for duplex examination of the lower extremity to evaluate for venous reflux.
2. Review techniques to improve diagnostic results when using vascular sonography to evaluate for lower extremity for venous reflux.
3. Explain normal from abnormal findings by interpreting ultrasound results.
