

WavelinQ™ EndoAVF System Clinical Immersion Program

The focus of the Clinical Immersion Program is to provide the physician with an observational experience of a patient undergoing creation of an endovascular arteriovenous fistula (endoAVF) for hemodialysis using the WavelinQ™ EndoAVF System.

The expert faculty will provide insight into a comprehensive multidisciplinary approach to patient management during this program.

Please contact your BD Sales Rep or email BDPI.Advance@bd.com for information on the next scheduled program.

Learning Objectives

- Review patient selection screening criteria
- Discuss case planning for the best procedural approach
- Observe procedural techniques for creation of an endoAVF utilizing the WavelinQ™ EndoAVF System
- Plan appropriate patient follow-up

Audience - Program limited to 3 attendees

General Surgeons, Interventional Cardiologists, Interventional Nephrologists, Interventional Radiologists, Transplant Surgeons, and Vascular Surgeons

Prerequisite

Prior completion of Phase I & Phase II WavelinQ™ EndoAVF System training

Agenda

- Day 1 - Arrive by 4:00 pm local time
 - Scientific and clinical round table dinner discussion with expert faculty
- Day 2 - Departure after 5:00 pm local time
 - Observation of clinic visits and procedures, including patient screening, live cases, and post-procedure monitoring and follow-up
