Same- or Next-Day Fracture Care

Fractures in children require prompt, specialized care to support proper healing and long-term function. Our pediatric orthopedic team offers evaluations within 24 to 48 hours for injuries that need urgent attention.

Please refer for same-day or next-day evaluation for fractures that are:

- Displaced or angulated
- Involving a growth plate
- Causing significant pain or swelling
- Limiting mobility or function

We also accept referrals for less urgent injuries, with timely appointments prioritized by clinical need.

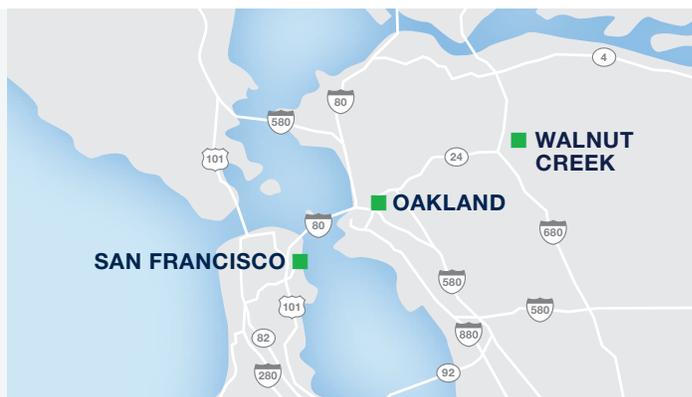

Clinic Locations

Oakland: 744 52nd St., First Floor

San Francisco: 1825 Fourth St., Fifth Floor

Walnut Creek: 2401 Shadelands Drive

Made accessible 02.2026
