EXPLORE SPECIALIZED PATIENT CONSULTATIONS AND SERVICES, NOW AT FOX CHASE – CHESTNUT HILL

## Where someone starts their cancer journey matters.

Behind every cancer patient at Fox Chase Cancer Center – Chestnut Hill is a multidisciplinary team of highly experienced and trained specialists who provide compassionate care and advanced therapies, ensuring the best possible outcomes with the fewest side effects. Fox Chase Cancer Center – Chestnut Hill provides expertise and state-of-the-art care from one of Philadelphia’s leading cancer centers in a setting that is close to home. And now, those needing a consultation for thoracic surgery or a biopsy can meet with specialists at Chestnut Hill.

### National Leaders in Surgical Oncology

For patients diagnosed with cancer or with abnormal test results, Fox Chase faculty surgical oncologists offer the latest traditional and robotic surgical techniques. Multidisciplinary specialists develop comprehensive care plans tailored to each patient for breast cancer, gastrointestinal cancers (colon, rectal, stomach, esophageal), gynecological cancers, hepatobiliary cancer (pancreas, liver), lung cancer, melanoma and sarcoma.

### Surgery to Restore Function, Appearance, and Quality of Life

Onsite microvascular and plastic surgeons offer advanced reconstructive surgery after breast cancer treatment and for melanoma, gastrointestinal cancers, and benign and malignant urologic indications. Our plastic and reconstructive surgeons offer expertise in preventing and treating lymphedema, restoring function and appearance after hand surgery, and for body contouring.

### Comprehensive Breast Cancer Care at Fox Chase – Chestnut Hill

- Early breast cancer screening, risk assessment, diagnosis, treatment, and reconstruction are all under one roof.
- Highly specialized breast surgeons and physician assistants collaborate in the diagnosis and evaluation of breast cancer and breast disease together with skilled mammography technicians and dedicated breast radiologists.
- Individually tailored treatment plans are created by the nation’s leading breast experts and breast surgeons in tandem with medical oncologists; radiation oncologists; reconstructive and plastic surgeons; pathologists; genetic counselors; and specialized oncologic nurses.

## High-Risk Breast Clinic

Our Risk Assessment Clinic offers tailored cancer screening and prevention services for those with a family history of breast and/or ovarian cancer; those with a cancer gene mutation; or individuals with a benign breast disease biopsy. Women who have had breast or ovarian cancer are eligible for testing.

## Genetic Counseling and Testing

Patients meet one-on-one with a genetic counselor from the Risk Assessment Program to determine the factors that increase a person's risk of developing cancer and whether genetic testing may be of value. Their services include:

- Creating a family tree to assess a person's overall genetic risk for cancer
- Determining eligibility for genetic testing
- Ordering genetic testing
- Discussing test results and cancer screening options
- Making recommendations regarding appropriate surveillance based upon a person's level of risk
