

ENDOFLATOR® 50 AND S-PILOT® STABLE CAVITY, SMOKE-FREE IMAGE

It's Time We Cleared the Air...

The ENDOFLATOR® 50 insufflator and S-PILOT® regulation for smoke-evacuation form an essential piece of the imaging chain, in order to provide excellent visibility during endoscopic interventions. This combination of units was created to have a stable cavity while removing dangerous toxins and unpleasant odors when needed.

ENDOFLATOR® 50 AND S-PILOT®

STABLE CAVITY, SMOKE-FREE IMAGE

It's Time We Cleared the Air...

- With a maximum flow of 50 l/min, the ENDOFLATOR® 50 rapidly creates a stable working cavity
- The heating element warms the CO₂ gas to a body temperature of 37° C
- The SECUVENT® safety system ensures that overpressure is immediately detected and excess gas is released
- Maximum flow and pressure can be preset to suit the needs of specific patients and procedures
- The S-PILOT® has a simple pinch valve and footswitch design that allows smooth integration with existing systems or use as a stand-alone unit

Ordering Information	
UI500	ENDOFLATOR® 50, with integrated SCB module
UP501S1	S-PILOT®, including footswitch
031210-10	Heated Insufflation Tubing Set, with gas filter, sterile, for single use, package of 10
031200-10	Insufflation Tubing Set, with gas filter, sterile, for single use, package of 10
