Advance your practice around implementation of newly available subcutaneous immunotherapy options in our 1-hour virtual-live CME/CE/CPE/AAPA/IPCE/MOC accredited interactive panel discussion. Leading experts in oncology, nursing, and pharmacy will share practical strategies and insights on workflow optimization, patient selection, real-world challenges, and more.

Earn continuing education credits while staying at the forefront of cancer immunotherapy. Register now!

## LEARNING OBJECTIVES

**ASSESS** the latest clinical data to compare SC and IV administration of ICLs, emphasizing the benefits of SC routes in oncology care.

**INTEGRATE** SC ICLs into personalized treatment plans by evaluating clinical evidence and patient characteristics to optimize therapy selection and effectively manage adverse effects.

**IMPLEMENT** multidisciplinary strategies to integrate SC ICLs into practice, optimizing workflow and enhancing patient care through effective team collaboration.

**INCORPORATE** patient preferences and quality-of-life considerations when deciding between SC and IV ICL administration methods to enhance patient satisfaction and outcomes.
