

UCSF Endocrine Surgery and Oncology Clinic

www.ucsfhealth.org/endocrinesurgery

BEST IN THE WEST

UCSF Medical Center is best in the West for diabetes & endocrinology

SCARLESS SURGERY

Innovators in surgical techniques, including scarless surgery

900+

Endocrine surgeries performed annually at our center

LEADERS IN

posterior retroperitoneoscopic adrenalectomy (PRA) procedure

CLINIC FEATURES

- Surgeons who are subspecialty-trained and leaders in the field of endocrine surgery
- Integrated and coordinated care, in close collaboration with our partners in endocrinology, genetics, oncology, radiology and pathology
- Regular multidisciplinary tumor board conferences to discuss complex cases
- Innovative methods in genetic diagnosis, novel imaging and minimally invasive surgical techniques for personalized treatments
- An internationally renowned research program, with rapid translation of promising research to the clinic

CONDITIONS TREATED IN ADULTS AND CHILDREN

- **Thyroid:** Thyroid nodules and goiters, thyroid cancer, Graves' disease
- **Parathyroid:** Hyperparathyroidism, parathyroid cancer
- **Adrenal:** Pheochromocytoma, Cushing's syndrome, primary hyperaldosteronism, adrenocortical cancer, adrenal metastases, adrenal incidentaloma
- **Pancreas:** Insulinoma, gastrinoma, neuroendocrine tumors
- **Familial endocrine diseases:** Multiple endocrine neoplasia (MEN) syndromes, hereditary medullary thyroid cancer, hereditary paraganglioma-pheochromocytoma syndromes

UCSF Health

WHY REFER?

- We are one of the largest endocrine surgery programs in the country, with seven experienced endocrine surgeons.
- Our expertise and our approaches are particularly important for patients who want state-of-the-art care, or have exhausted conventional therapies.
- We have expanded our faculty to optimize patient scheduling.
- We are one of the few centers in the world offering scarless thyroid and parathyroid surgery, a procedure developed at UCSF.
- We offer posterior retroperitoneoscopic adrenalectomy (PRA) and parathyroidectomy under local analgesia.
- We offer unique imaging processes, including noninvasive assessment of vocal cord function (laryngeal ultrasound), 4D CT, and parathyroid PET/MRI.
- We provide a range of clinical services including consultations, second opinions and comprehensive multidisciplinary co-management.
- Our multidisciplinary centers include the Advanced Thyroid Surgery Center, the Advanced Parathyroid Surgery Center, the Center for Adrenal Surgery and the Center for Familial Endocrine Syndromes.

OUR TEAM

Quan-Yang Duh, MD, FACS

Endocrine surgeon
Chief, Section of Endocrine Surgery

Jessica Gosnell, MD, FACS

Endocrine surgeon

Sanziana A. Roman, MD, FACS
