

# Interventional Cardiology Program

[ucsfhealth.org/interventional-cardiology-program](https://ucsfhealth.org/interventional-cardiology-program)

**AMONG THE NATION'S BEST**  
UCSF Medical Center is nationally ranked in cardiology & heart surgery.

**SPECIALIZED EXPERTISE**  
Fellowship-trained, board-certified leaders in the field

## INNOVATIVE CARE AND SUPERIOR OUTCOMES FOR CARDIAC PATIENTS

The UCSF Interventional Cardiology Program offers the latest minimally invasive catheter-based procedures to diagnose and treat the full spectrum of cardiovascular conditions, including coronary artery disease, valvular heart disease, heart failure, adult congenital heart disease and peripheral artery disease. Our team uses a multidisciplinary approach to personalize care and achieve superior outcomes for our patients.

## CONDITIONS TREATED

The cardiovascular conditions diagnosed and treated by our expert team includes:

- Adult congenital heart disease
- Aortic stenosis
- Coronary artery disease
- Heart failure
- Mitral regurgitation
- Mitral stenosis
- Patent foramen ovale (PFO)
- Peripheral artery disease
- Tricuspid regurgitation
- Valvular heart disease

**UCSF Health**

## SERVICES OFFERED

In addition to the latest diagnostic techniques, we offer a range of innovative treatments, including:

- Alcohol septal ablation
- Atrial septal defect closure
- Complex and high-risk coronary interventions / Chronic total occlusion (CTO) revascularization
- Percutaneous mechanical circulatory support
- Minimally invasive atrial septal defect (ASD) closure
- Patent ductus arteriosus (PDA) closure
- Percutaneous coronary intervention (PCI)
- Peripheral atherectomy
- Transcatheter aortic valve replacement (TAVR)
- Transcatheter mitral valve repair and replacement
- Transcatheter tricuspid valve repair and replacement

## WHY REFER TO UCSF?

- **High-volume center:** Thousands of procedures are performed here annually, from routine diagnostic procedures to complex percutaneous coronary intervention.
- **Leading-edge treatments:** Research and experience come together to bring the latest treatments to our patients sooner.
- **Renowned experts:** Our fellowship-trained, board-certified interventional cardiologists are recognized as leaders in the field.
- **Multidisciplinary approach:** Collaboration with specialists in cardiac surgery, electrophysiology, advanced heart failure, adult congenital heart disease and vascular surgery translates to the most individualized and comprehensive treatment.
- **Access and convenience:** All of our interventional cardiologists are available to our patients via telehealth visits.

## OUR TEAM

### Sammy Elmariah, MD, MPH

Interventional cardiologist  
Director of Interventional Cardiology

### Harsh Agrawal, MD, FACC, FACP

Interventional cardiologist

### Anna T. Beyer, MD

Interventional cardiologist

### Richard Cheng, MD

Interventional cardiologist

### Sung Choi, MD

Interventional cardiologist

### Thomas A. Ports, MD

Interventional cardiologist

### Kendrick "Rick" Shunk, MD

Interventional cardiologist

### Krishan V. Soni, MD, FACP, FACC

Interventional cardiologist

### Joseph Yang, MD

Interventional cardiologist

### Yerem Yeghiazarians, MD

Interventional cardiologist

### Jeffrey Zimmet, MD, PhD

Interventional cardiologist

### Rachel Osborne, NP, MSN

Nurse practitioner
