Board-certified specialists at the UCSF Health Interventional Cardiology Program evaluate and treat patients with complex cardiovascular diseases. Highly skilled in advanced procedures, the team develops personalized treatment plans for each patient and provides a continuum of care, from diagnosis through recovery. Our clinical trials offer groundbreaking therapies not available at most other centers.

Procedures and Services

- **Coronary interventions:** Expertise in complex percutaneous coronary intervention (PCI), including microvascular disease testing, complex high-risk indicated (CHIP) PCI and chronic total occlusion (CTO) PCI
- **Valve therapies:** Transcatheter aortic valve replacement (TAVR), mitral and tricuspid edge-to-edge repair (TEER) and transcatheter mitral and tricuspid valve replacement (TMVR, TTVR)
- **Left atrial appendage occlusion (LAAO):** Minimally invasive procedure that reduces stroke risk for patients with atrial fibrillation
- **Heart failure and pulmonary hypertension interventions:** Mechanical support devices, transcatheter shunt implantation and balloon pulmonary angioplasty
- **Adult congenital heart disease:** Transcatheter closure of atrial septal defects (ASD) and patent foramen ovale (PFO) and interventions for complex pulmonary valve and congenital heart conditions

Interventional Cardiology Program: 400 Parnassus Ave., Fifth Floor | San Francisco, CA 94143

Why Refer to UCSF?

- **Multidisciplinary, personalized care:** Cardiac and vascular surgeons, electrophysiologists and specialists in heart failure, congenital heart disease and other complex conditions collaborate to develop individually tailored patient-care plans.
- **Clinical trial portfolio:** Access to novel therapies unavailable at most centers, giving your patients treatment options beyond the standard of care
- **National recognition:** UCSF Health is consistently ranked among the nation's top cardiology and heart and vascular surgery programs by U.S. News & World Report.
- **Quality awards:** Recipient of the 2024 American Heart Association Target: Aortic Stenosis Honor Roll award and the 2025 Coronary Artery Disease STEMI Receiving with Target: Type 2 Diabetes Gold award
- **Continuum of care:** Our team manages your patients across the full course of treatment, from diagnosis through intervention and post-procedure follow-up, with timely updates back to you.
